1979 "CIA" Invert

- 30 ★★田 \$1 tan, brown orange and yellow, brown inverted, block of four, n.h. and post office fresh, v.f., one of only three known blocks of four of this popular error. Discovered in 1985, the CIA Invert was the first major inverted stamp in 66 years. The story began when an auctioneer specializing in U.S. error stamps announced the discovery (by a "business in northern Virginia") of 85 inverted 1979 \$1 Rush Lamp stamps. The Bureau of Engraving and Printing launched an internal investigation and found that there were no indications of impropriety by its employees. It was discovered that an on-duty C.I.A. employee had purchased a partial sheet of 95 inverted stamps at a small post office near McLean, Virginia. When the office workers realized what they had, they pooled their money and substituted non-error \$1 Rush Lamp stamps for the inverts. Each of the nine co-workers kept a stamp. The remaining 86 stamps, including one that was damaged, were quietly sold to the auctioneer. The story made headlines across the nation and was featured on every major television network. The CIA launched an ethics investigation and demanded that the co-workers surrender their inverts or face 10 years in prison and a \$10,000 fine for conversion of government property for personal gain. Five employees returned their stamps, one claimed his had been lost, and three people resigned. The CIA donated the recovered inverts to the National Postal Museum(1610c) 60,000.00
